Subject: Re: ATSDR data and information request for Gold King

Kai,

I'll check with Craig Meyers on the status of this request when I arrive on Durango.

Greg,

ATSDR is requesting the following data and information from EPA via the Area command in Durango CO when it becomes available. We are requesting this in response to a request from EPA 8 (Craig Myers) on Aug 14 2015 to provide ongoing health assessment support. ATSDR Region 8 Representative Chris Poulet was in Durango from Aug 11 to Aug 15 and received the request when he was down there. Chris was working with Craig and Joyel Dhieux while on scene.

Animas River

-historic, pre-event surface water sampling data for the Animas. We understand this is being compiled into a searchable format and this would be very useful for ATSDR's review.

-historic , pre-event, sediment sampling data for the Animas.

Other Locations--ATSDR would also like to obtain:

-Private Well data for the wells being tested by EPA in the Animas River basin

-Sampling plans, sample location descriptions, and DQOs for surface water, sediment, and well data.

If things have changed and you are prohibited from sharing this information, please let me know. If you have questions, you can reach me at this email address or at 208-391-8539 (cell) or 208-378-5767 (office). If I need to check with another source for this request, please let me know.

Thanks,

KAI
